

Buford Highway Medians and Landscape (CD – 60)

This project will construct a new raised landscape median and landscaping on Buford Highway. Sections of the median will include stamped decorative concrete. The landscaping will utilize small trees and shrubs and include seasonal plantings. The median will provide a more aesthetically pleasing view for motorists and local shops. The project will enhance the pedestrian facilities along the edge of Buford Highway by upgrading pedestrian ramps to comply with ADA standards. All crosswalks and driveways will be reconstructed. Finally, a grass buffer between the curb and the sidewalk will be included to provide a boulevard environment and safer separation between traffic and pedestrians. Design began in March of 2012. Right of Way acquisition is complete and the project is working toward completion of construction documents by the end of 2016. Construction is anticipated in the first quarter of 2017. This project is funded through 2005 and 2009 SPLOST along with a Georgia Department of Transportation (GDOT) TE Grant.

Design Approval – Pending

Right of Way Acquisition – Complete

Construction – Summer of 2017

Construction Duration – 12 months
